

RMSE60, RMSE80, RMSE115 ROBATAYAKI

A multi-tier open charcoal grill equipped with accessories to perform a range of cooking techniques using grills, Teppanyaki hot plates or skewers. Robata grilling lends to an array of foods from meat, fish, seafood and vegetables, imparting light smoky aromas and flavours we seek in grill cooking. Manufactured with steels of the latest technology following the most rigorous quality controls.

The MIBRASA® Robatayaki RMSE has an incorporated elevating system, designed and patented by MIBRASA® enabling height adjustments between the grill and hot coals to provide the chef with total control allowing them to cook with more efficiency. Originating from the Japanese tea ceremony, which over time found its way to the north Japanese fishermen utilising this method to keep food hot while out at sea for long periods.

The evolution of the Robatayaki has brought it into the modern day kitchen, where chefs prepare food and display their showmanship in front of diners allowing them to take part in the entire cooking experience.
